# Quest Windows Server Management Solutions

Simplify and Optimize Your IT Management Infrastructure

Many organizations today have built their IT infrastructures primarily around Microsoft solutions, such as Active Directory, Exchange or SharePoint. IT staff need to make the most of this investment, providing a high level of service while meeting both internal IT policies and external industry regulations. IT leaders must glean more value from their current infrastructure and applications by reducing costs and complexity, and also improve the organizations' productivity by keeping the infrastructure running efficiently and transparently to the end user.

And IT shops must do all this with flat or shrinking budgets. While they can try to make use of native tools already in house, native tools just aren't sufficient to meet the demands of today's IT infrastructures. With native tools, managing multiple platforms takes too long, so help desk calls go unanswered, systems go unmonitored, changes go untracked, and IT is forced to constantly react to issues instead of prevent them. Therefore, IT managers and directors are looking for a single reliable vendor that can provide the full spectrum of IT solutions that reduce risk, cost and complexity while increasing the value of their current IT management investments.

Quest Software is that vendor. Trust the experts at Quest – two-time winner of Microsoft's Global ISV Partner of the Year and Advanced Infrastructure Solutions Partner of the Year – to help your IT organization reduce cost, complexity and risk in your Microsoft Windows-based infrastructure. Quest's Windows Server Management solutions include:

- ZeroIMPACT migration
- Compliance and IT governance
- Recovery and availability
- IT administration and automation
- Development and optimization

BENEFITS

- Migrates, consolidates or restructures disparate platforms, directories and data quickly, lowering risk and cost

- Ensures availability of systems and data, and continuity of operations, reducing risk of downtime and lost productivity

- Enables IT to satisfy compliance requests fast, reducing the burden on IT and risk to the business

- Helps IT deliver, build and manage scripts and custom applications fast, reducing the time needed to perform custom projects

- Complements existing platform investments, using automation to improve administrator productivity and service to end users

- Is backed by global support and services, providing the most Windows experience available outside of Microsoft

WHY QUEST?

- 85 million users and mailboxes migrated to Exchange, Active Directory, SharePoint and Office 365

- 90 million Windows users managed by Quest solutions

- Two-time Microsoft Global ISV partner of the year

- More partners, Windows developers and support engineers than any other ISV outside of Microsoft

Exchange   OCS/Lync   Active Directory

WINDOWS MANAGEMENT PLATFORMS

Lotus Notes   SharePoint

GroupWise   Office 365   PowerShell

Quest provides solutions to migrate from competitive and Microsoft platforms as well as manage them after the migration.

Quest ZeroIMPACT Migration Solutions

Whether driven by a merger, acquisition, consolidation or new platform, Quest's proven ZeroIMPACT migration approach provides assurance to IT organizations that transitions will be fast and efficient, that end users will be able to collaborate without interruption, and that the organization will be exposed to less risk.

Quest Compliance and IT Governance Solutions

Reduce the stress and pressure on your IT organization to meet the requirements of an ever-increasing number of internal policies and external regulations with Quest. Eliminate distractions. Remove complexity. Be proactive with preventative measures to protect critical data in Windows and beyond. React quickly to compliance problems with regulation-specific assessments, audits, alerts and remediation.

Quest Recovery and Availability Solutions

Maintain the availability and performance of the Microsoft infrastructure and meet SLAs with Quest Recovery and Availability solutions. Be proactive and stay on top of system health to avoid business interruptions. If interruptions to business critical systems do occur, trust Quest to troubleshoot and repair problems and streamline the data recovery process.

Quest IT Administration and Automation Solutions

Quest Administration and Automation solutions help IT get the most out of their investments by automating day-to-day tasks and processes in Microsoft platforms. Rely on Quest's solutions every day to improve administrator productivity by automating the management of Active Directory, Exchange, Office Communications Server/Lync, SharePoint and Office 365.

Quest Development and Customization Solutions

Quest provides administrators the flexibility to build on the functionality of Microsoft Windows-based platforms, enabling them to accomplish more in less time. Quest provides the solutions IT organizations and developers need to configure, script, build and test new applications in SharePoint and PowerShell.

About Quest Software, Inc.

Established in 1987, Quest Software (Nasdaq: QSFT) provides simple and innovative IT management solutions that enable more than 100,000 global customers to save time and money across physical and virtual environments.
